5.....	Structured Walkthrough

Meets Requirements

- **Technologies**
 - The project was developed using ASP.NET Core Web Application (Razor Pages) and Microsoft SQL Server
- **Registration**
 - The web application allows users to create an account by registering and asks users for the following information:
 - First name
 - Last name
 - Email
 - Password
 - Telephone
- **Authorization**
 - People who have not registered can only access pages and features that they are authorized to.
 - Patients can only access pages and features that they are authorized to.
 - Nurses can only access pages and features that they are authorized to.
 - Doctors can only access pages and features that they are authorized to.
- **Item Management**
 - Patients (users) can request (add), edit, and delete appointments (items)
 - Nurses (other user/admin-like type) can add, edit, and delete appointments. Nurses can add, edit, and delete items from inventory. Nurses can add, edit, and delete users. Nurses can view prescriptions.
 - Doctors (administrators) can add, edit, and delete appointments. Doctors can add, edit, and delete items from inventory. Doctors can add, edit, and delete users. Doctors can add, edit, and delete users. Doctors can add, edit, and delete prescriptions.
- **Interface and Layout**
 - The interface and layout are responsive and have similar consistency from browser to browser (Google Chrome and Microsoft Edge).
 - The interface and layout were developed using Bootstrap and designed with Bootstrap Icons.

Project Summary

Our project aims to streamline healthcare management by developing a comprehensive system that caters to the needs of patients, nurses, and doctors. At its core, the system enables patients to access and manage their profiles, view prescriptions, and schedule appointments conveniently. Patients have the autonomy to update their profiles and request appointments, while doctors and nurses possess the authority to manage all user profiles, items, and oversee appointments. Moreover, doctors can completely manage prescriptions, while nurses can only view them for reference. By providing a user-friendly interface and comprehensive functionalities, our project aims to enhance the efficiency and effectiveness of healthcare delivery, benefiting both patients and healthcare providers alike.

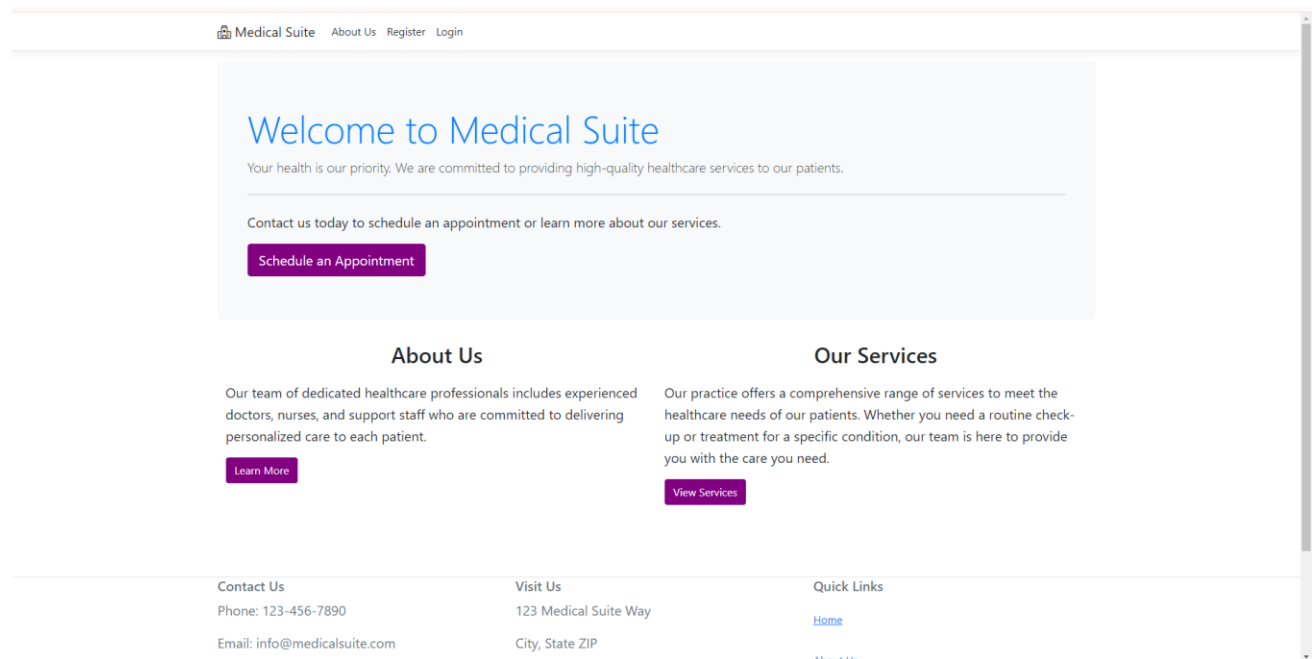

Features:

1. Landing/Home page
 - a. This page has general information about the Medical Suite, and buttons to schedule an appointment, learn more, and view services.
2. Registering
 - a. Users are able to create an account by registering with their information
3. Logging in
 - a. Users are able to log into their account by entering their information on the login page and pressing
4. Profile management
 - a. Users are able to view and edit their profile information in their account
 - b. Doctors and nurses can also view and edit other users profile information
5. Appointment management
 - a. Users are able to view and request appointments
 - b. Nurses and Doctors are able to view, add, edit, and delete appointments
6. Prescription management
 - a. Users are able to see the prescriptions that have been prescribed to them
 - b. Nurses are able to view patients' prescriptions
 - c. Doctors are able to view, add, edit, and delete prescriptions
7. Inventory item management
 - a. Doctors and Nurses are able to view, add, edit, and delete inventory items.

Structured Walkthrough

Generally:

When someone comes to our website, they will be brought to our homepage. The home page has an “About us” section and button that will take users to the About Us page. It also has an “Our Services” section and button that will take users to the About Us page. Additionally, it has some welcome text, and a button to Schedule an Appointment. If the user isn’t signed in, this will take them to the Login page. The about us page has some information about the doctor's office we developed this website for.

Using the nav bar, the user can navigate between the home page, about us page, register page, and login page.

The register page allows the user to put in their information (first name, last name, email, password, and telephone), then they may register. If some information is missing that is needed, the user will be told before they are able to register. After clicking “Register”, users are taken to the login page.

Patients:

The profile page allows patients to view their information. Additionally, if the patient wants to view their prescriptions, they can click on view prescriptions; this will take them to the page to view their prescriptions. Furthermore, if the patient wants to view their appointments, they can click on view appointments, and will be taken to the view appointments page. Finally, if a patient wants to edit their profile, they can click on edit profile and will be redirected to the edit profile page.

With the new nav bar, the patient now can click on their profile to view their profile page, or they can sign out.

Using the nav bar, a patient can request appointment and view their appointments.

Moreover, patients can use the nav bar to view their prescriptions.

The request appointment page allows patients to input information about the appointment they are requesting. Then they can schedule the appointment and will be taken to the view appointments page.

The edit appointments page allows the patient to edit the information regarding an appointment. After inputting the correct information, the patient can press “Update Appointment” and the appointment will be updated and they will be taken back to the view appointments page.

The screenshot shows the 'Edit Appointment' page. At the top, there is a navigation bar with 'Medical Suite' and links to 'About Us', 'Appointments', and 'Prescriptions'. A 'Profile' link is on the right. The main content area is titled 'Edit Appointment' and 'Update appointment information below:'. It contains four input fields: 'Date' (05/14/2024), 'Time' (01:59 PM), 'Notes' (I am feeling nauseous and am very lethargic), and 'Doctor's Name' (John Doe). A purple 'Update Appointment' button is at the bottom of the form. The footer contains contact information, visit details, and quick links.

If the nurse presses “Add”, they will go back to the add inventory item page.

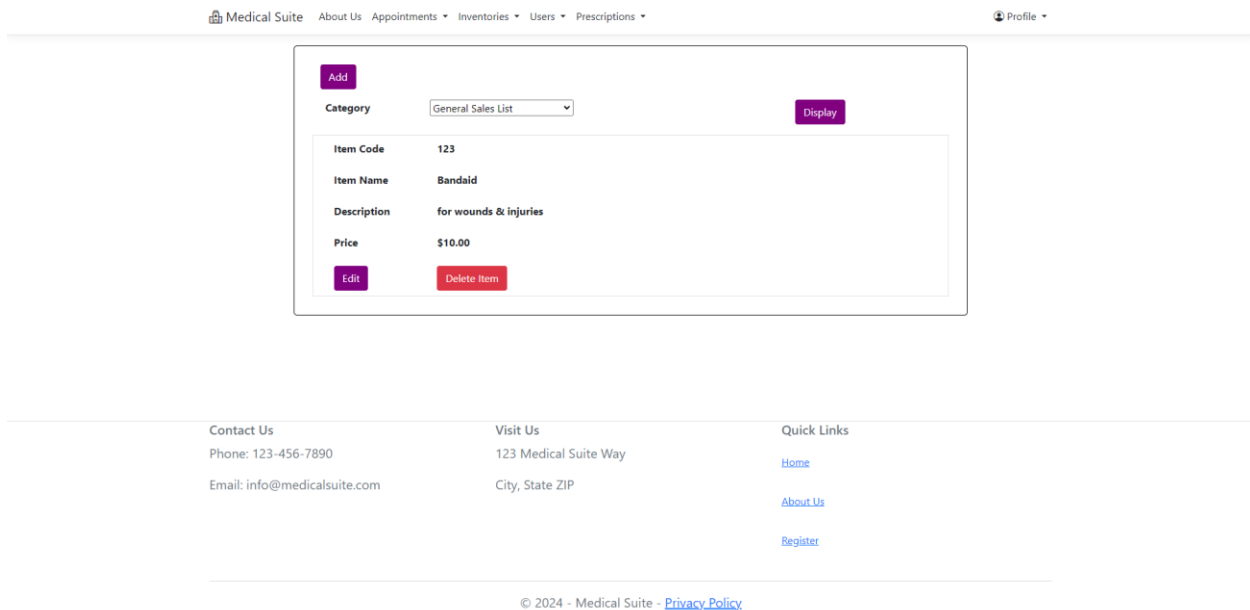

The nurse can press “Edit” and will go to the edit item page where they can update the inforation about the item:

After they make the updates they want to, they can press “Update” and they will go back to the view inventory items page, and they can select the category of the item they changed, and then press “Display” to see the updates:

The nurse can press “Delete Item” and will be asked to make sure they want to delete the item with a pop up.

After pressing “OK” the item will be deleted. And the nurse will go back to the view items page. If they select the same category they just deleted from, they will see the update:

Using the nav bar, when the nurse navigates to “View Users”:
